

Table material is made to float with the environment:

```
\begin{quote}
  \verb=\begin{table}= \emph{head\_text\quad table\quad foot\_text\quad}
  \verb=\end{table}
\end{quote}
```

where `\emph{table}` stands for the entire table as defined in the `\texttt{tabular}` environment, `\emph{head_text}` for whatever text appears above the table, and `\emph{foot_text}` for that below. Width, spacing, and positioning of the texts relative to the table are all matters for the user to arrange.
